

TO FILL TANK QUICKLY

(This way takes about 1 hour, but be careful not to overfill.)

1. Be sure outside drain is closed.
2. Open valve marked with yellow dot.
3. When tank is filled over the last step, shut off valve.
4. Turn on pump switch in electrical box.
5. Let pump run for about 2 minutes before turning on the water heater switch in electrical box.

TO DRAIN TANK

1. Turn off heater switch in box.
2. Open outside drain.
